Workshops

Common Sense Media
What is Digital Citizenship?

Presented by Technology Coordinator Justin Lander: This is an online resource built to help parents stay informed about media and internet trends. Common Sense Media provides various resources to help empower parents to help their children make technology a positive force in their lives.

How can parents help their children with Math?

Presented by Math Coordinator Cassie Shannon: Our mathematics coordinator, will show parents how they can help their children with math from home. She will begin by showing them how to gain access to online resources such as ThinkCentral and Dreambox Learning. She will then share ideas how parents can work with their children to help them gain greater fluency in mathematics.

Learn About Databases & eBooks

Presented by STREAM teachers Ms. McKenna and Ms. Taylor: Are you tired of your children using their iPads for games and YouTube Kids? Do you wish there was something engaging and educational they could do with their devices? STREAM teachers Giselle Taylor and Jessica McKenna will show you how you and your child can access free educational databases at home. These databases contain eBooks, articles, educational games and so much more. Using them will help support your child's learning in school and enable them to become self-driven researchers at home.

Science & Your Child

Presented by Science Coordinator Alexa Doeschner and Mary Jean McCarthy (Adelphi University): The average American child spends over 56 hours per week staring at some kind of electronic screen according to A Kaiser Family Foundation study.

We would like you to imagine a world in which all children grow up with a deep understanding of the natural life around them. Where the more high-tech our lives become, the more we experience nature in our lives.
